

In November 2012, CFCLA successfully leased a ballast train set including a Dash 8 locomotive, CHAY ballast wagons and a ballast plough to Laing O Rourke on the FMG Solomon iron ore new line development project in the Pilbara. This train set as well as another two similar sized train sets are earmarked for delivery to the Pilbara region for new rail construction and or existing rail maintenance purposes. These train sets shall be available for lease in 2013/14. See below photos.
